

ISAAC ZACHARY

PROFILE

I'm passionate in software development with essential skills in web design, database management systems, system' installation, customization and troubleshooting. I'm always ready to learn new skills to fit in a broader career path with minimal or no supervision and dedication to serve. I have learnt to be self-dependent in personal projects and be an active team player in group projects. I believe that I'm in a capacity to add value to your organization's workforce and aid in meeting its goals.

EDUCATION

KCPE

January 2004 – November 2014

Attended primary school education at Embakasi Garrison, Nairobi. Actively participating in extra curriculum activities like sports and music festivals

KCSE

March 2015 – November 2018

Attended secondary school education at Mwongori High, Sotik with an active participation in contests, music, sports and scouting

BSC SOFTWARE ENGINEERING

September 2019 – Present

Currently attending higher learning studies partaking a degree in software engineering getting to understand more about computer systems, technology evolution, programming languages, software development, database management systems and many more in the field

EMPLOYMENT HISTORY

December 2018 – March 2019: Customer Care Agent

Worked as an M-pesa agent in Soweto, Nairobi at a small-scale retail shop and created a good rapport with the customers serving them with dignity and leading to an increased commission from the service providers

June 2019 – September 2019: Casual Medical Employee

Worked with competence at Sphinx in Embakasi, Nairobi area in all the required departments like cleaning, packaging, sealing and filling of the different kinds of tablets and oral medicines from the industry's production chamber

December 2019 – August 2020: Technician Assistant

Worked hand in hand with an experienced Telecommunications Engineering Technician as an intern as well as a personal assistant in the field equipping myself with hardware skills in the world of telecommunication, system installations, troubleshooting and some simple programming.

EXTRA-CURRICULAR ACTIVITIES

May 2019 – Present: Coding

I have been code self-teaching in different programming languages in addition to what I gain from my course content. For now, I am seriously working on my personal projects building up websites for “my company” that is a platform for anyone that will be in need of a creative website portfolio either for individual or business contact and also my portfolio for easy contact. I have deployed the websites on GitHub for references:
