Attended secondary school education at Mwongori High, Sotik and managed to score an average B grade of 59.98 points and active participation in contests, music, sports and scouting

BSC SOFTWARE ENGINEERING

September 2019 – Present

Currently attending higher learning studies partaking a degree in software engineering getting to understand more about computer systems, technology evolution, programming languages, software development, database management systems and many more in the field

💼 EMPLOYMENT HISTORY

<u>**CUSTOMER CARE AGENT**</u>**: December 2018 – March 2019**

Worked as an M-pesa agent in Soweto, Nairobi at a small-scale retail shop and created a good rapport with the customers serving them with dignity and leading to an increased commission from the service providers

<u>**CASUAL MEDICAL EMPLOYEE**</u>**: June 2019 – September 2019**

Worked with competence at Sphinx in Embakasi, Nairobi area in all the required departments like cleaning, packaging, sealing and filling of the different kinds of tablets and oral medicines from the industry's production chamber

<u>**TELECOMMUNICATION TECHNICIAN**</u>**: December 2019 – August 2020**

Worked hand in hand with an experienced Telecommunications Engineering Technician as an intern as well as a personal assistant in the field equipping myself with hardware skills in the world of telecommunication, system installations, troubleshooting and some simple programming.

EXTRA-CURRICULAR ACTIVITIES

Coding: May 2019 – Present

I have been self-teaching myself how to code in different programming languages in addition to what I gain from my course content. For now, I am seriously working on my personal projects building up websites for "my company" that is a platform for anyone that will be in need of a creative website portfolio either for individual or business contact and also my portfolio for easy contact. My project links are:
